# the Master Course

# An introduction to **Express.js**

{ CODENATION }

# Express.js

## What is Express.js?

Express is a back-end Node framework that allows an app to transfer data over http requests.

{ CODENATION }

Express.js

# What is Express.js?

As an NPM library, Express gives us a variety of methods to build a web server in Node.

{CODENATION}

# Express.js

**Express allows us to listen on certain paths and deal with a HTTP request before sending a HTTP response.**
